# Modern Modular: The Prefab Houses Of Resolution: 4 Architecture

## Synopsis

Prefabricated housing of high design and quality construction has long been an elusive goal for architects, where industry practices, bureaucratic regulations, and cost have always stood in the way—until now. The New York–based firm Resolution: 4 Architecture is revolutionizing prefab housing with their Modern Modular design system. Home designs based on modules of use intended for communal or private spaces are mixed and matched to achieve an infinite number of designs suited to each buyer's site, budget, and lifestyle. Modern Modular, the first book on the critically acclaimed firm, presents fourteen beautifully photographed case studies illustrating each step in their prefab system—from design and fabrication to transportation, siting, and final construction of distinctively modern and surprisingly affordable new homes.

## Customer Reviews

Like the book, but knocked off 2 stars for tiny diagrams and tiny text. I wish architects and designers would think of the usability of their published materials, not just their architectural designs. I will keep this book, but if I had checked/known in advance that it would be hard to read, I would probably not have bought it.

Prefab, with the new guarantees of quality and fast building, offer a really appealing path to home ownership, and Resolution: 4 Architecture offers all that plus appealing designs. Good book.

I bought this book and others in the same vein because I'm planning on building my own home and wanted some ideas and inspiration. It has both in huge quantities as well as explaining architectural volume and unity so that will really help too.

I love modern modular architecture and this book is a decent resource. I'm sure most or all of these homes are far beyond my budget but they're nice to look at.
