# Who Built That? Skyscrapers: An Introduction To Skyscrapers And Their Architects

## Synopsis

Nothing in the built world captures the imagination like the skyscraper. Behind every soaring tower stands a designer with courageous vision and enough engineering know-how to pull off incredible feats of architectural derring-do. *Who Built That? Skyscrapers* is a colorful tour of the world's tallest buildings and the larger-than-life personalities who built them. Beginning with a brief biographical sketch of each architect, illustrator Didier Cornille imaginatively depicts the construction of eight of the world's most impressive skyscrapers. From Gustave Eiffel's Eiffel Tower (1889) in Paris and Mies van der Rohe's Seagram Building (1958) in New York City to the tallest man-made structure in the world, Adrian Smith's Burj Khalifa (2010) in Dubai, this primer will introduce readers of all ages to new heights of architectural wonder.

## Book Information

Series: Who Built That?

Hardcover: 84 pages

Publisher: Princeton Architectural Press (September 2, 2014)

Language: English

ISBN-10: 1616892706

ISBN-13: 978-1616892708

Product Dimensions: 7 x 0.6 x 10.1 inches

Shipping Weight: 15.2 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (4 customer reviews)

Grade Level: 2 - 7

## Customer Reviews

Excellent book! This is a wonderful book to read to your child and let them see how buildings are built. Wonderful drawings and information.

It is simple, well designed, and not too wordy - concise. My eight year old son loves it, which is the true test.

This is a great book to introduce architect to kids. The words are easy to understand and the painting a clear and nice. My son loves this book.

Thanks!
