God Help The Outcasts  
Kiss The Girl  
Mickey Mouse March  
The Bare Necessities  
The Siamese Cat Song  
Winnie The Pooh  
You'll Be In My Heart (Pop Version)  
Zip-A-Dee-Doo-Dah

My kids(5&7) are up and coming pianists. They love to mess around with the piano on their own at different times of the day. They enjoy a few of the songs in this book. We use several different teaching books including the Teaching Little Fingers to Play- beginning course. But they don't want to just learn music, they want to play music, the real stuff- ASAP! That's the way I learned: pure desire. I do spend time going over basic music skills, theory and easy finger exercises; however, the bulk of our time and their practice is learning songs. It's mostly rote and ear, but they love to play

the catchy, memorable, to them, songs until they have perfected them. Then they show them off to others. They're eager to do this without me urging them on or grinding the lessons into their easily distracted minds- so, I'm running with it, and trying to find music that appeals to them. There's only a few songs in this book, and the only ones they like are The Siamese Cats, Kiss the Girl and somewhat, Winnie the Pooh. The rest of the songs are too boring for them or a bit obscure. They include teacher accompaniments and some finger numbering. The songs sound OK and with repeated practice the children get them down fairly quickly. Each child is different and learns as such. I pencil the ivories with numbers and notes; play the song for them, suggesting fingerings, and let them go- helping them when they ask or when they're in the mood, leaving them alone when they want private time with the instrument. An updated book with more popular songs sure would be great!

This is a great collection of songs for beginning piano students. They are all centered around middle C, and they progress well in difficulty (never particularly taxing, but the students definitely learn from going through the book). I often use this either on its own, or in coordination with a method book (I like the Piano Adventures series - this would go well after the prep book and before level 1). The students do need to be able to read the notes for middle C position (though the fingerings provided would also serve as a crutch). It's the easiest of the Disney song collections that I use regularly, and students love it.

This isn't really for beginners, but it is a fun addition to our piano library.

I like this book because it is easy for beginners but also has songs that my daughter can recognize. This book is a great motivator because she is playing music she likes.

I can kind of play the piano/keyboard. I can read music and played the flute in high school. This was very hard for me to figure out and I could not teach my daughter at all. Maybe she is too little?? Maybe I am??? Maybe I need to be a piano teacher, probably the last one. Not for the lay person!

I purchased this piano book for my 8 year old grandson who is just learning to play. He was doing well, but when he got this book everything seemed to click for him. The method that is used is just great and he caught on to concepts that he was struggling with when using the other piano book. I would highly recommend this for anyone that age who is learning to play the piano.

Bought as a birthday present for a student. Kids ALWAYS like learning songs they know. Has optional teacher duets. Layout is a little confusing at first, but that's only because of the duet format. I realize that you can't pick all the Disney songs, but I wish there were a little more or different ones in the book. I'm sure they're out there though! I'll find when the time comes
