Architectural Surfaces: Details For Artists, Architects, And Designers (Surfaces Series)

Synopsis

The latest addition to the acclaimed Surfaces series catalogs hundreds of different architectural elements and materials. This new collection contains over 1,400 high-quality color photographs capturing a range of details and surfaces, organized by architectural elements: walls, facades, windows, doorways, ceilings, roofs, floors, pavements, columns, and arches. Architectural Surfaces provides a wealth of source material to meet the research needs of architects and interior designers, artists, scenic designers, and graphic designers. CD-ROM included: screen resolution scans in easy-to-use JPEG format for Mac and PC. 1600 color photos

Customer Reviews

Judy A. Juracek's ARCHITECTURAL SURFACES: DETAILS FOR ARTISTS, ARCHITECTS AND DESIGNERS comes with a cd-rom and provides students and professional practitioners alike with a new addition to the 'Surfaces' series. Hundreds of different architectural features are portrayed in well over a thousand color photos which capture details and provide a subject organization for quick, easy reference. Professionals and students alike will appreciate the illustrated glossary of technical terms, and the wealth of illustration packs four to six good-sized photos on almost every page.

This is a picture book for architects to illustrate various treatments, hundreds of various treatments

for surfaces. Surfaces includes walls, facades, ornaments & moldings, columns & posts, windows, doorways, ceilings & roofs, floors & pavement. The concept is to show what has been done by others which can help in filling out their ideas about projects. And it is useful in showing or asking clients for their comments on proposed treatments. All in all there are some sixteen hundred photographs in the 350 or so pages of the book. The overall design of a building is the first thing that is noticed, but the surface treatment isn't far beyond. And unlike the design, the surfaces from the floor to the ceiling are covered in paint, carpets, drapes, dozens of different treatments. All in all, the surface finishing may be the most expensive part of the building. This is a reference book that belongs in any architectural library.

Loved it!

The book sounded great. However, I wanted to get ideas for residential design: doors, columns, ceilings etc. The book is a compilation of photos taken across a myriad of environments. The vast majority are exterior shots. I wanted many interior shots. Very disappointed that now I have to pay return shipping for a product that was not well described. I suggest develop some type of categorization system to aid the buyer to determine suitability of purpose. If could do that, pure genius.
