My first pick for lesson book (for this age and level), is Bastien Piano Library (traditional) Primer Piano Lessons, Technic Lessons, and Theory Lessons (three orange books), but they are out of print and hard to come by. This is Bastien's 'modern' replacement for the Piano Library series. It's full color and has great cartoons, but the songs don't sound like songs (not even to 5 year olds). They are repetitive and mundane. The older series does a better job of including familiar folk ditties and tunes into the primer level books so that the student feels like he or she is learning something "cool." In addition, the combination Theory and Technic and division of primer level into two separate primer levels A and B, lengthens the time it takes to learn the material. They do a good job teaching the required theory and technic, in a basic way, but the theory work is mostly dry (not fun) and students don't get enough note spelling work. This sets the stage for future problems if you

don't know what you're dealing with. A mediocre book, all in all- they just don't make things the way they used to! I'll keep ordering my "old" lesson books and waiting 9 weeks for delivery...

Great learning books for children beginning piano. My daughter started lessons at age 3 and is now 6 years old. Her instructor has ONLY used this series of piano books (theory, piano, and techniques) since she started and she is now able to play full songs with both hands, and sometimes with accompaniment. She is proficient in reading music, playing, and technique up to the level she has reached thus far. She is currently working on the pink level books. The books are full of cute pictures that grab the attention of the little ones, worksheet type exercises or quizzes that are easy for children to understand, and fun learning songs which some are very recognizable to the kids such as twinkle twinkle little star. The books I've ordered have always come sooner than the estimated date and in perfect condition. I highly recommend this series of piano books for the young piano players.

Perfect for my 8 year old beginner, started with primer A Theory and Technic and has moved up to Primer B. We use in conjunction with the Piano for the Young Beginner Primer B.

Great start for the little ones. They love the interaction of coloring/writing while learning to play. Easy for them to learn step-by-step concepts. Colorful, fun pictures.

This is the second book of the Bastien Piano Basics and my son really was able to understand the concepts and learn note reading and theory with the book!! I recommend it!

My five-year old daughter is learning theory very easily using this book. It is very age appropriate and interesting for her.

I used this series to teach my younger siblings piano and am now using it to teach my children. I still like it!

good book for piano playing. Teaching is rather simply put for young learner
