Summary: "Birds and Butterflies" contains 84 full size illustrations, 5 pages of introductory material, and a 7 page glossary. It measures 9.75 inches square and is glue bound in a laminated cover- the inside of which is partially colorable. Featuring nature inspired drawings of birds, flowers, and insects, this book would be appropriate for most colorists (excepting young children) and all experience levels. Paper: The paper contained in this book is bright white and fairly heavy (think scrapbooking weight). All pages are double sided and non-perforated. I am able to see the printing on the reverse in some areas. Pencils, crayons, watercolors, and chalk should all be appropriate for use, but markers and pens will either bleed through or cause shadowing. If you do choose to use ink

mediums, keep in mind that you will ruin one side of the page. Be sure to test them in the back of the book before applying to your picture and place some extra sheets of paper behind your current project. Artwork: As stated in the title, "Birds and Butterflies" features insects and birds in a line drawing style. Inside you'll see peacocks, penguins, pelicans, and more- along with a nice selection of butterflies, moths, and flowers. There are also some fish, fancy hats, and tea sets sprinkled throughout for variety. The book seems to be evenly split between double and single page spreads, and most of the artwork does run into the binding. The images included range in style from whimsical to realistic, and there are some patterns and mandala type pages spaced throughout. You'll also find a few reverse printed images (black background) to experiment with. Detail level does vary from page to page, but all of the lines are clean and the pictures are easy to read.
