Customer Reviews

I'm a little disappointed That I spent 8.99 on this. This says this is for adults but my two year old could color this with ease. Basically, the pictures are big outlines with 100 little numbers of the same digit in each big outline. This should not be listed for adults. And definitely should not be 8.99. I will still color it and share with my co workers. Save your money folks

If only I knew about LaPicara review before I bought the book through Barnes and Noble. DON'T DO IT PEOPLE!!! Worst color by number ever. Personally I suggest you visit Mindware and browse those; I love them.

NOT adult level. Basically a made-at-home booklet of city skylines. Hard pass.

Not quite what I expected. The numbers are very tiny, and while I'm not blind, by 12 year old even

had issues. He preferred the non-numbered pages to color. A very thin book, too, and I can imagine that this would be a good gift for someone who like to be very meticulous. I recommend getting NARROW POINT colored pencils.

These are cartoony images and not very indicative of the city being represented. Wanted true skylines. Would be fun for another type of art project but just beware when you order this it's not true skylines.

I was incredibly disappointed to discover this is NOT a true color by number. The pages are regular coloring pages with no codes or numbers. There are numbers with colors on the back, which doesn't actually help anything.

While really liked this book and that you can color the same drawings with no numbers later, There were some cities that were missing colors in the key and the colors just didn't really make sense in some places. I will say that it was neat to see the picture "develop" as you color along.

I love Sesame Street; have loved it for more than thirty years. The pages of this book seem to have been drawn by an aspiring Sesame Street storyboard artist. The images are pleasant, yet simple. Each page is in the book twice; one page with numbers, the other without. It was my mistake to expect realistic or complex images to be featured in this book. I assumed such qualities were a given, provided the signifier "adult" in the category "coloring books." I've given the book to a friend's 6 year old son. Maybe he'll enjoy it.
