# Room And Furniture Layout Kit

## Synopsis

All you need to create the room of your dreams! Moving into a new house or apartment? Refurnishing your present living space? Now you don't have to waste time and energy endlessly repositioning heavy pieces. This easy-to-use furniture layout kit will help you design your rooms efficiently, accurately, and with a sense of balance. You can lay out a full eight rooms of furnishings with 215 punch-out shapes: beds, chairs, sofas, tables, cabinets, pianos, bookcases, and more. Plus, eight sheets of graph paper are included for your floor plans. Designing your own rooms can be a fulfilling experience. And with this inexpensive kit, you can make all the right choices before purchasing or moving a single piece of furniture.

Publisher: Dover Publications; 38206th edition (October 1, 1981)

Language: English

ISBN-10: 0486242137

ISBN-13: 978-0486242132

Product Dimensions: 8.2 x 0.2 x 10.9 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars [See all reviews](#) (70 customer reviews)

Best Sellers Rank: #56,703 in Books (See Top 100 in Books) #28 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Home Repair](#) #49 in [Books > Arts & Photography > Architecture > Interior Design](#) #71 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > Decorating & Design > Decorating](#)

## Customer Reviews

TO ALL THOSE COMPLAINING OF THE SCALE OF THE GRAPH PAPER AND/OR FURNITURE PIECES.....Look at the graph paper you have and find a piece of furniture that is an even 24" which is 2 feet on one side. I used the 24" x 24" chair but there are plenty of other pieces you can use. Place the piece on your graph paper and see how many squares it covers on one side, drawing around the piece or the one side onto your graph paper. I have the few sheets that came with the set, plus I bought a package of "quad" graph paper as well as another that is bound in a notebook. The sheets that came with the set as well as the quad sheets both are the same and the 24" side covers 4 squares. ( $24" / 4 = 6"$ ) So that means each square is a half a foot or six inches. The other paper that I have is on a smaller scale and the same 24" side covers 5 squares. ( $24" / 5 = 4.8"$ ) So

that means each square is 4.8 inches. If you require exactness without any room for error than you will want to buy the quad paper. (I got mine at walmart and it was inexpensive.) But if you want to use what you have you can go ahead and use this. Chances are you are not going to be measuring the exact distance between your chair and the wall and the coffee table (for example) so it will be close enough to still use and appreciate this set to make the most of it. I absolutely love this set, and I can't believe I waited so long to order it. It makes my life easier because I'm not asking the hubby to move everything a dozen times before I am happy with a room layout. I can experiment on paper first. Marking the areas for windows, closets, doors etc. If you don't find the size of furniture that you need by words, go by measurements.
